1. 기관 IP 대역대에서 www.embase.com 으로 직접 접속 합니다.
2. 기관 도서관에 로그인 후 전자DB Embase를 찾아 클릭합니다. (기관 IP 대역에서 벗어나 있을 때 활용하면 좋은 방법입니다)

The screenshot shows the Embase Quick Search page. At the top, there is a navigation bar with links for Search, Emtree, Journals, Results, and My tools, along with a Sign in button. Below this is a blue header with the word 'Quick' and a 'Select Language' dropdown. The main content area has a sub-header with links for Quick, PICO, PV Wizard, Medical device, Advanced, Drug, Disease, Device, and Citation Information. The central text prompts the user to 'Find articles by simple keyword search or build more complex queries' and includes a 'Search tips' link. A search input field contains the example text 'Broad search e.g. 'heart attack' AND stress'. Below the input field are links for '+ Add field' and 'Limit to', and a 'Reset form' button. A large 'Show results' button is positioned below the input field. At the bottom, there is a link to 'Display full query'.

Dorland's dictionary
cancer = a neoplastic disease the natural course of which is fatal. Cancer cells, unlike benign tumor cells, exhibit the properties of invasion and metastasis and are highly anaplastic. Cancer includes the two broad categories of carcinoma and sarcoma, but in normal usage it is often used synonymously with carcinoma.
neoplasia = the formation of a neoplasm, i.e., the progressive multiplication of cells under conditions that would not elicit, or would cause cessation of, multiplication of normal cells.
neoplasm = any new and abnormal growth; specifically a new growth of tissue in which the growth is uncontrolled and progressive (see neoplasia). Malignant neoplasms are distinguished from benign in that the former show a greater degree of anaplasia and have the properties of invasion and metastasis. Called also tumor.
tumor = a new growth of tissue in which the multiplication of cells is uncontrolled and progressive; called also neoplasm.
tumor = swelling, one of the cardinal signs of inflammation; morbid enlargement.
